

Software Center

The Software Center will allow the user to initiate installation of software to their computer. Any software that you see in the list has been tested and approved by the District.

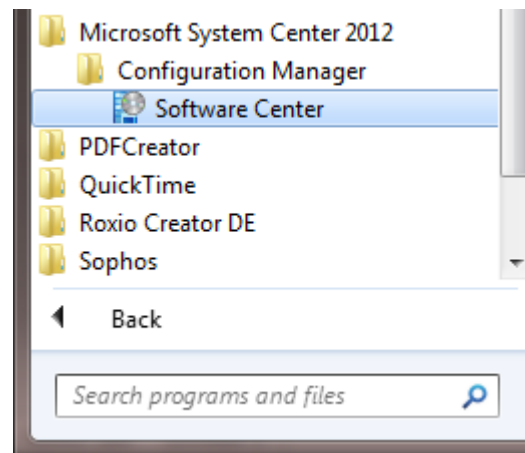

Follow the instructions below to install desired software.

1. Press the Start  Button on the lower left corner of your desktop.

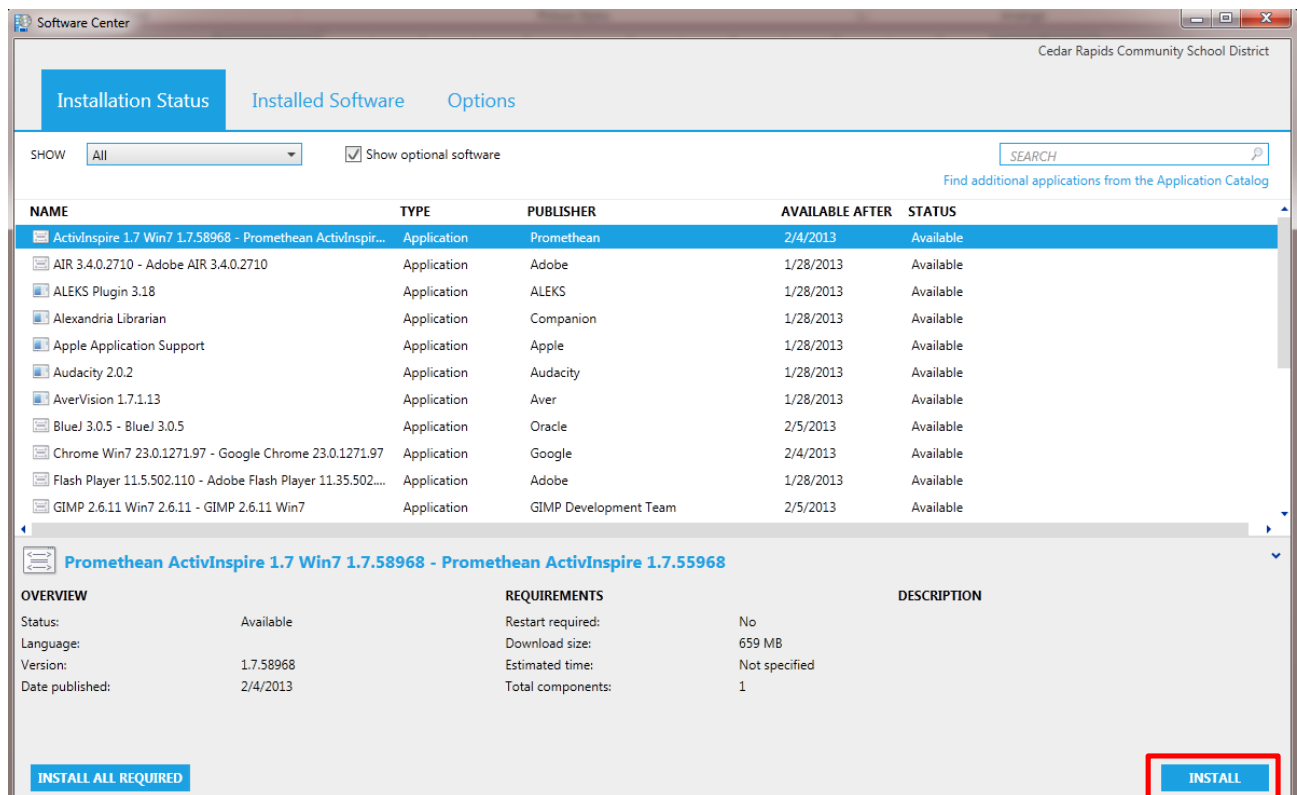

2. Select All Programs

3. Select **Microsoft System Center 2012**
4. Select **Configuration Manager**
5. Select **Software Center**

6. The screen at the bottom will appear.
7. Select an application and press **Install**.

A screenshot of the Software Center application window. The window title is 'Software Center' and it shows 'Cedar Rapids Community School District' in the top right. The interface has tabs for 'Installation Status', 'Installed Software', and 'Options'. Below the tabs, there is a 'SHOW' dropdown set to 'All' and a checked box for 'Show optional software'. A search bar is on the right. A table lists various applications with columns for NAME, TYPE, PUBLISHER, AVAILABLE AFTER, and STATUS. The application 'Promethean ActivInspire 1.7 Win7 1.7.58968 - Promethean ActivInspire 1.7.58968' is selected. Below the table, there is an overview section for the selected application, including status, language, version, date published, requirements, and description. At the bottom, there are two buttons: 'INSTALL ALL REQUIRED' and 'INSTALL', with the 'INSTALL' button highlighted by a red box.
